Subject: Request for Investigation and Data Disclosure Regarding Criminal Use of My Verified X Accounts

Dear Sir or Madam,

I am writing to formally request your assistance concerning ongoing criminal cyber activities involving my X (formerly Twitter) accounts, which have been verified and subscription-based since 2024.

Since 2018, I have been a victim of persistent cyberstalking, and since 2020, this has escalated into serious criminal misuse of my personal data and published content. The abusive activities involve the unauthorized use of my identity, posts, and account data within the public domain, which I believe constitute violations of privacy and possibly identity fraud.

Given the serious nature of these offenses and their cross-border implications, I respectfully request that Twitter International:

1. Collect and preserve all data related to misuse of my personal data and digital content within my verified and paid X accounts;
2. Disclose such data directly to the Dutch authorities, specifically:
 - The Dutch Public Prosecution Service (Openbaar Ministerie), Landelijk Parket;
 - The National Police of the Netherlands, particularly the Oost-Brabant unit.

If direct data disclosure is not legally permissible under your jurisdiction, I kindly ask that you invite the aforementioned authorities to initiate a formal criminal investigation at your location in Ireland.

Should you require any documentation, including police reports or written authorizations, I am prepared to provide these upon request.

Thank you in advance for your cooperation and support in addressing this matter. I look forward to your response.

Sincerely,

Cora Westeink (gbs)
